Bulletin sur l'activité cyclonique (ZCIT) *Cyclone activity bulletin (ITCZ)*

AWIO20 FMEE 020959

BULLETIN FOR CYCLONIC ACTIVITY AND SIGNIFICANT TROPICAL WEATHER IN
THE SOUTHWEST INDIAN OCEAN
DATE: 2010/02/02 AT 1200 UTC

PART 1 :

WARNING SUMMARY :

Warning nr 03/11 related to the moderate tropical storm FAMI,
issued at 0600Z

Next warning at 1200Z

PART 2 :

TROPICAL WEATHER DISCUSSION :

Transequatorial monsoon flow is moderate to rather strong between
African coastline and 55E and extends up to 18S.

Poleward, a broad talweg extends to 73E and due to the lack of
trade winds flow, ITCZ is only sustained equatorward.

Over the Mozambique Channel,
at the rear of a trough passing to
the South, the associated southerly flow and the monsoon flow feed
the moderate tropical storm FAMI (named at 0600Z).

Over the Indian Ocean, deep convective activity is scattered and
fluctuating between equator and 10S,
east of 63E.

System n 11 :

The system has landed at about 0900Z on the Malagasy west coast in
the vicinity of Belo.

Located at 0930Z, near 20.9S et 43.9E, movement East at 7 kt.

MSLP estimated at 992 hPa.

Max average wind speed (10 min) 45 kt.

Elsewhere there is no other suspect area.

For further details, see warnings n 03/11 and followings

For the next 48 hours, there is no potential for development
of an other tropical depression

- Emis avant 12 TU
•*issued before 12 UTC*
- Bulletin technique pour les services météo de la zone
•*Technical bulletin for meteorological services of the area*

Description de l'activité convective au sein de la ZCIT, des minima et de leur potentiel de développement en dépression tropicale ($Ci \geq 2.5$)

Description of the ITCZ convective activity, the observed lows and their potential for development as a tropical depression ($Ci \geq 2.5$)

PAN PAN

HURRICANE WARNING FOR METAREA VIII (S)

ISSUED BY METEO-FRANCE/TROPICAL CYCLONE CENTRE/LA REUNION 19/02/2010 AT 0000 UTC.

WARNING NUMBER: 016/12 (SOUTH-WEST INDIAN OCEAN)

10 MINUTES AVERAGE WIND SPEED IN KNOTS (KT)

(WIND GUSTS AT SEA MAY BE ABOUT 40% STRONGER THAN THE AVERAGED WIND).

MINIMUM SEA LEVEL PRESSURE IN HECTOPASCALS (HPA)

(INDICATIVE FIGURE).

HURRICANE WARNING

BEGINNING OF VALIDITY: FRIDAY 19/02/2010 AT 0000 UTC.

PHENOMENON: TROPICAL CYCLONE 12 (GELANE) 968 HPA

POSITION: 16.3S / 62.3E

(SIXTEEN DECIMAL THREE DEGREES SOUTH AND SIXTY TWO DECIMAL THREE DEGREES

EAST) AT 0000 UTC

MOVEMENT: SOUTH 6 KT

THREAT AREAS:

SQUALLY WEATHER EXISTS WITHIN 70 NM RADIUS FROM THE CENTRE , EXTENDING UP TO 200 NM IN THE SOUTHERN SEMI-CIRCLE.

HURRICANE FORCE WINDS 65/75 KT AND VERY HIGH TO PHENOMENAL SEAS WITHIN 10 NM RADIUS OF THE CENTER.

STORM FORCE WINDS 50/60 KT AND HIGH TO VERY HIGH SEAS WITHIN 15 NM RADIUS OF THE CENTER EXTENDING UP TO 25 NM IN THE SOUTHERN SEMI-CIRCLE.

GALE FORCE WINDS 35/45 KT AND VERY ROUGH TO HIGH SEAS WITHIN 30 NM RADIUS OF THE CENTER EXTENDING UP TO 60 NM IN THE SOUTHEASTERN SEMI-CIRCLE.

NEAR GALE FORCE WINDS 30KT AND ROUGH TO VERY ROUGH SEAS WITHIN 50 NM RADIUS OF THE CENTER , 150 NM IN THE SOUTHERN SEMI-CIRCLE.

STRONG GUSTS UNDER SQUALLS.

FORECAST POSITION AND INTENSITY:

12H, VALID 2010/02/19 AT 12 UTC:

17.5S / 61.8E, MAX WIND = 75 KT, TROPICAL CYCLONE.

24H, VALID 2010/02/20 AT 00 UTC:

18.5S / 61.1E, MAX WIND = 65 KT, TROPICAL CYCLONE.

OTHER INFORMATIONS:

THE INTENSITY OF THE SYSTEM HAS SLIGHTLY INCREASE DURING THE LAST HOURS. IT TRACKS VERY SLOWLY SOUTHWARDS, BUT IS EXPECTED TO RECURVE PROGRESSIVELY SOUTH-SOUTHWESTWARDS THEN SOUTHWESTWARDS .

Le système d'alerte à La Réunion

Pré-alerte cyclonique : mise en garde contre le péril cyclonique.

Une perturbation tropicale évolue dans la zone et représente une menace potentielle pour La Réunion dans les jours qui viennent (au-delà de 24 h).

Alerte orange: la menace cyclonique se précise.

Il peut y avoir danger pour le département dans les 24 heures à venir.

Les établissements scolaires et les crèches ferment, mais la vie économique continue.

Alerte rouge: le danger cyclonique est imminent.

Le phénomène affectera La Réunion dans les heures qui viennent.

Il est alors interdit de circuler.

Le passage en alerte rouge est annoncé avec un préavis de 3 heures pour permettre à la population de se mettre à l'abri.

Phase de prudence: la menace cyclonique est écartée, mais des dangers subsistent

Etablissements scolaires et crèches restent fermés,
mais la vie économique reprend.

The Alert system in Reunion Island

Cyclonic pre-alert : warning for cyclone risk

A tropical depression exists in the area and can be a potential threat for Reunion Island during the next days (beyond 24 hours)

Orange alert : the cyclonic threat is more precise

There can be a danger for the department within the next 24 hours. Schools and nurseries are closed, but economic life continues.

Red alert: imminent danger

La Reunion Island will be touched within next hours. It is forbidden to move in roads, people have to stay where they are.

Announced 3 hours before, to allow people to take shelter.

Prudence phase: there is no cyclonic threat anymore, but it remains some dangers.

Schools and nurseries remain closed, but economic life can start again.
