

TABLE OF CONTENTS

Topic Title	Topic Chair / Rapporteur	Page
Topic 0 Special Theme: Quantitative Forecasts of Tropical Cyclone Landfall in relation to an Effective Warning system	Jim Davidson (Australia)	
Report of Topic Chair	Jim Davidson (Australia)	1
0.1 Track forecasts	Lixion Avila (USA)	12
0.2 Observations and forecasts of wind distribution	Sai-Tick Chan (Hong Kong, China)	19
0.3 Observations and forecasts of rainfall distribution	Lianshou Chen (China)	36
0.4 Observations and forecasts of storm surges	Shishir Dube (India)	43
0.5 Observations and forecasts of hydrology-related issues	Kang Thean Shong (Malaysia)	56
Topic 1 Tropical cyclone structure and structure change	Hugh Willoughby (USA)	
Report of Topic Chair	Hugh Willoughby (USA)	62
1.1 Environmental effects on tropical cyclone structure and Structure Change	Liz Ritchie (USA)	68
1.2 Tropical cyclone Inner-core dynamics	Jeffrey D. Kepert (Australia)	79
1.3 Air-sea interface and oceanic influences	Nick Shay (USA)	120
1.4 Operational techniques in defining tropical cyclone structure	Mark Lander (USA)	151
1.5 Operational guidance and skill in forecasting structure change	John Knaff (USA)	160
<i>Special Focus Topics</i>		
1a Tutorial on the use of satellite data to define tropical cyclone structure	Chris Velden (USA)	185
1b Field experiments related to tropical cyclone structure (CBLAST & RAINEX)	Peter Black & Shuyi Chen (USA)	214

Topic 2 Tropical cyclone formation and extratropical transition		Pat Harr (USA)	
Report of Topic Chair		Pat Harr (USA)	256
2.1	External influences on formation	Bill Frank (USA)	261
2.2	Internal influences on tropical cyclone formation	Mike Montgomer (USA)	266
2.3	Operational forecasting of tropical cyclone formation	Jeff Callaghan (Australia)	288
2.4	Observing and forecasting of extratropical transition	Jenni Evans (USA)	305
2.5	Physical processes and downstream impacts of extratropical transition	John Gyakum (Canada)	320
<i>Special Focus Topics</i>			
2a	The Catarina phenomenon	Pedro Silva Dias (Brazil)	329
2b	Special Focus Session THORPEX: a focus on tropical cyclone related research	Jim Abraham (Canada)	361
 Topic 3 Tropical cyclone motion		 Russ Elsberry (USA)	
Report of Topic Chair		Russ Elsberry (USA)	373
3.1	Advances and requirements for operational track prediction	Tsz-Cheung Lee (Hong Kong, China)	376
3.2	Improvements in understanding and prediction of tropical cyclone motion	Sim Aberson (USA)	390
3.3	Targeted observation and data assimilation in track prediction	Chun-Chieh Wu (PSA)	409
<i>Special Focus Topic</i>			
3a	Sharing experiences in operational consensus forecasting	Andrew Burton (Australia)	424

Topic 4 Climate variability and seasonal prediction of tropical cyclone activity/intensity		Chris Landsea (USA)	
Report of Topic Chair		Chris Landsea (USA)	442
4.0	The recent active Atlantic hurricane seasons	Max Mayfield (USA)	446
4.1	Variability of tropical cyclone activity/intensity on intraseasonal and interannual scales	Chang-Hoi Ho (Republic of Korea)	456
4.2	Possible relationships between climate change and tropical cyclone activity	Tom Knutson (USA)	464
4.3	Short-term climate (seasonal and intraseasonal) predictions of tropical cyclone activity/intensity	Suzana Camargo (USA)	493
<i>Special Focus Topic</i>			
4a	Updated statement on the possible effects of climate change on tropical cyclone activity/intensity	John McBride (Australia)	500
Topic 5 Disaster mitigation, warning systems and societal impact		M C Wong (Hong Kong, China)	
Report of Topic Chair		M C Wong (Hong Kong, China)	505
5.1	Evaluating the effectiveness of warning systems	Woo-Jin Lee (Republic of Korea)	510
5.2	Factors contributing to human and economic losses	Roger Pielke Jr. (USA)	533
5.3	Mitigation strategies and community capacity building for disaster reduction	Linda Anderson-Berry (Australia)	556
<i>Special Focus Topic</i>			
5a	Report to the IWTC-VI on the PROGRAM FOR IMPROVEMENTS TO HURRICANE INTENSITY FORECASTS AND IMPACTS PROJECTIONS (HiFi)	Greg Holland & Roger Lukas (USA)	564
